

SMM 10.3.2 3rd Mate Safety Inspection Form

Procedure

- Continual maintenance is required to keep the ship in a safe operating condition and is part of normal ship operations. While efforts to mitigate side effects of maintenance shall be made, this work is an essential part of the ship's routine.
- The following Deck 3rd Mate Safety Inspection Form shall be completed by the 3rd Mate and submitted to the Master.
- Any major discrepancies shall be immediately pointed out to the Master, and the DP notified.
- Any need for additional resources to safely complete the maintenance should be forwarded to the Master and the shore-based management.
- The 3rd Mate will fix minor discrepancies and appropriately order supplies such as batteries, flares, etc., ahead of time to ensure equipment is kept operational within all expirations.
- During scheduled maintenance periods for the vessel, the requirement for monthly critical equipment forms may be suspended with approval from the Port Captain.
